WHAT DOES THE FUND INVEST IN?	
<p>The fund seeks to track, to the extent possible, the price and yield performance of the Bloomberg Barclays Canadian Short Aggregate Enhanced Yield Index (the "Index"), before fees and expenses. The investment strategy of the fund is to invest in and hold the Constituent Securities of the Index in the same proportion as they are reflected in the Index or otherwise invest in a manner intended to track the price and yield performance of the Index (e.g., sampling). As an alternative to or in conjunction with investing in and holding the Constituent Securities, the fund may invest in or use certain other securities to obtain exposure to the price and yield performance of the Index. The Index is designed to broadly capture the short-term Canadian investment grade, fixed income securities market while seeking to enhance yield within desired risk parameters and constraints. The Index uses a rules-based approach to include subgroups of the Bloomberg Barclays Canadian Aggregate Index (i.e., treasuries, government-related, credit and securitized debt) with effective maturities generally shorter than five years ("CAD ST Agg Universe") and to re-weight such subgroups with the aim of earning a higher yield while broadly retaining the risk characteristics of the CAD ST Agg Universe. To be eligible for the CAD ST Agg Universe and for inclusion in the Index, debt securities must be rated investment grade, have a fixed rate coupon, have at least \$300 million in par amount outstanding, be denominated in Canadian dollars and have at least one year to final maturity.</p> <p>The charts below give you a snapshot of the fund's investments on June 14, 2017.
