WHAT DOES THE FUND INVEST IN?

The fund seeks to track, to the extent possible, the price and yield performance of the WisdomTree U.S. Quality Dividend Growth Index Variably CAD-Hedged (the "Index"), before fees and expenses. The investment strategy of the fund is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or otherwise invest in a manner intended to track the price and yield performance of the Index (e.g., sampling). As an alternative to or in conjunction with investing in and holding the constituent securities of the Index, the fund may invest in or use certain other securities to obtain exposure to the price and yield performance of the Index. The Index is comprised of the 300 companies included in the WisdomTree Dividend Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share. Any exposure that the fund may have to the U.S. dollar may be hedged back to the Canadian dollar, which may range from 0% to 100% and will be based on certain quantitative signals (namely, interest rate differentials, momentum and value).
