WHAT DOES THE FUND INVEST IN?

The fund seeks to track, to the extent possible, the price and yield performance of the WisdomTree Europe CAD-Hedged Equity Index (the "Index"), before fees and expenses. The investment strategy of the fund is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or otherwise invest in a manner intended to track the price and yield performance of the Index (e.g., sampling). As an alternative to or in conjunction with investing in and holding the constituent securities of the Index, the fund may invest in or use certain other securities to obtain exposure to the price and yield performance of the Index. The Index consists of dividend paying companies included in the WisdomTree International Equity Index that are domiciled in Europe and are traded in Euros, have at least \$1 billion market capitalization and derive at least 50% of their revenue in the latest fiscal year from countries outside of Europe. The component securities are weighted in the Index based on annual cash dividends paid. Any exposure that the portfolio of the fund may have to foreign currencies will be hedged back to the Canadian dollar.
