WHAT DOES THE FUND INVEST IN?

The fund seeks to track, to the extent possible, the price and yield performance of the WisdomTree U.S. High Dividend Index CAD (the "Index"), before fees and expenses. The investment strategy of the fund is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or otherwise invest in a manner intended to track the price and yield performance of the Index (e.g., sampling). As an alternative to or in conjunction with investing in and holding the constituent securities of the Index, the fund may invest in or use certain other securities to obtain exposure to the price and yield performance of the Index. The primary starting screening universe for the Index is the constituents of the WisdomTree Dividend Index with market capitalization of at least \$200 million. Securities ranking in the highest 30% by dividend yield are selected for inclusion. The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share. Any exposure that the portion of the portfolio of the fund attributable to the hedged units may have to the U.S. dollar will be hedged back to the Canadian dollar.
