**WHAT DOES THE FUND INVEST IN?**

The fund seeks to track, to the extent possible, the price and yield performance of the WisdomTree International Quality Dividend Growth Index CAD (the "Index"), before fees and expenses. The investment strategy of the fund is to invest in and hold the constituent securities of the Index in the same proportion as they are reflected in the Index or otherwise invest in a manner intended to track the price and yield performance of the Index (e.g., sampling). As an alternative to or in conjunction with investing in and holding the constituent securities of the Index, the fund may invest in or use certain other securities to obtain exposure to the price and yield performance of the Index. The Index is comprised of the top 300 companies from the WisdomTree International Equity Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. Companies are weighted in the Index based on annual cash dividends paid. Any exposure that the portion of the portfolio of the fund attributable to the non-hedged units may have to foreign currencies will not be hedged back to the Canadian dollar.
