The annual capital gains distributions are automatically reinvested in additional units and immediately consolidated so that the number of units held by each investor, the outstanding units of the Funds, and the net asset value of the units of the Funds, do not change as a result of the capital gains distribution. Investors holding units outside of registered plans will have taxable amounts to report and an increase in the adjusted cost base of their investment. The tax characteristics for all distributions declared in 2016 will be reported in early 2017.
