The WisdomTree U.S. Quality Dividend Growth Variably Hedged Index ETF™ seeks to track the price and yield performance of the WisdomTree U.S. Quality Dividend Growth Index Variably CAD-Hedged, a fundamentally weighted index designed to provide exposure to dividend-paying U.S. companies with growth characteristics, while at the same time variably hedging currency exposure to fluctuations between the value of the U.S. dollar and the Canadian dollar.

Index Description

The WisdomTree U.S. Quality Dividend Growth Index Variably CAD-Hedged is a fundamentally weighted index designed to provide exposure to dividend-paying U.S. companies with growth characteristics, while at the same time variably hedging currency exposure to fluctuations between the value of the U.S. dollar and the Canadian dollar. The primary starting screening universe for the Index is the constituents of the WisdomTree U.S. Dividend Index with market capitalization of at least \$2 billion. The Index is comprised of the 300 companies in the WisdomTree U.S. Dividend Index with the best combined rank of growth and quality factors. The growth factor ranking is based on long-term earnings growth expectations, while the quality factor ranking is based on three year historical averages for return on equity and return on assets. The Index is dividend weighted annually to reflect the proportionate share of the aggregate cash dividends each component company is projected to pay in the coming year, based on the most recently declared dividend per share. The Index variably hedges currency fluctuations in the relative value of the U.S. dollar against the Canadian dollar, which may range from 0% to 100%, and is based on certain quantitative signals (namely, interest rate differentials, momentum and value).

Commissions, management fees and expenses all may be associated with investing in WisdomTree ETFs. Please read the relevant prospectus before investing, which is available at WisdomTree.com. WisdomTree ETFs are not guaranteed, their values change frequently and past performance may not be repeated. The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and do not take into account sales, redemption, distribution or operational charges or income taxes payable by any unitholder that would have reduced returns. Performance of less than one year is cumulative total return.

Please note that Canadian law does not allow the display of performance data for ETFs in operation less than one year.

Disclosures

12-month Trailing Yield: The trailing yield is calculated by totaling cash distributions over the past 12 months and dividing by the Fund NAV from the as-of date. This figure is net of management fees and other fund expenses.

Distribution Yield: The yield is calculated by annualizing the most recent cash distribution and dividing by the Fund NAV from the as-of date. This figure is net of management fees and other fund expenses.

Management Expense Ratio (MER): As reported on the Fund's most recent Management Report of Fund Performance. MER is the total of the Fund's management fee and operating expenses, including all waivers and absorptions, and is expressed as an annualized percentage of the average daily net asset value.

Net Total Return (NTR): Net total return includes changes in the index value and reinvestment of all net distributions after deduction of withholding taxes.

The **WisdomTree U.S. Dividend Index** is a fundamentally-weighted index that defines the dividend-paying portion of the U.S. stock market. The Index measures the performance of U.S. companies, listed on the NYSE, NASDAQ Global Select or NASDAQ Global Market, that pay regular cash dividends and that meet other liquidity and capitalization requirements established by WisdomTree. Prior to June 30, 2017, the WisdomTree U.S. Dividend Index was named the WisdomTree Dividend Index.

The **WisdomTree U.S. Quality Dividend Growth Index Variably CAD-Hedged** was launched on June 7, 2016. Performance of the Index prior to the launch date represents hypothetical back-tested data.
