Annual Management Report of Fund Performance

For the period ended December 31, 2017

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Annual Management Report of Fund Performance (“MRFP”) for the WisdomTree Yield Enhanced Canada Aggregate Bond Index ETF (the “ETF”) for the period ended December 31, 2017. The ETF trades on the Toronto Stock exchange (the “TSX”) under the ticker symbol CAGG.

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Capital Management Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the Bloomberg Barclays Canadian Aggregate Enhanced Yield Index (the “Index”), before fees and expenses. The Index is designed to broadly capture the Canadian investment grade fixed income securities market while seeking to enhance yield within desired risk parameters and constraints.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index. The ETF may also invest in or use certain other securities to obtain exposure to the price and yield performance of the Index.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended December 31, 2017. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

From the ETF's inception of June 22, 2017 to December 31, 2017, the ETF operated in accordance with its investment objective of tracking the Index and returned -0.69% versus the index return of -0.65%. The difference in performance of the ETF relative to its benchmark index is related to management fees and other miscellaneous factors.

The broad Canadian bond market, as measured by the Bloomberg Barclays Canadian Issues 300 Index, returned -1.03% in CAD terms over the same period.

The period was characterized by relatively low volatility in equities, but some unexpected market volatility for longer-duration bonds. Equities saw steady gains, powered primarily by positive consumer expectations, low inflations globally, U.S. implications of tax reform, and business survey data and corporate profit growth. However, shortly after the ETF launched in late June of 2017, the Bank of Canada (BOC) surprised the markets and rose their key interest rate by 25bps to 1.00%, which drove yields higher. Yields continued to rise through mid-October, where they eventually settled at 2.05% on the Canadian 10-year Treasury at the end of the year. For context, the Canadian 10-year Treasury yield was at 1.5% when the ETF launched.

Similar to the U.S. yield curve, the Canadian yield curve flattened, as the 10-year spread decreased over the period. However, expectations are that the BOC will raise rates again in 2018, with potentially more rate hikes to follow to indirectly match the U.S. Federal Reserve's same intentions. The ETF benefited from its credit overweight, as credit outperformed the other asset classes of the broad benchmark.

The U.S. dollar strengthened following the election, but that strengthening was reversed as expectations of fiscal stimulus moderated, geopolitical risks ramped up, and the U.S. dollar lost approximately 5% to the Canadian dollar over the period. The ETF benefited from the Canadian dollar currency movement.

RECENT DEVELOPMENTS

On November 30, 2017, Questrade Fixed Income Core Plus ETF merged with the ETF. The Questrade unitholders received Non-Hedged Units of the ETF based on an exchange ratio determined by the relative value of the Questrade ETF to the Non-Hedged Units of the ETF.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Karen Fisher ¹	Newcastle, Ontario
Gerry O' Connor	Woodbridge, Ontario
Anthony Cox	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see “Management Fees” below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net assets value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at December 31 of the year shown.

⁵ The management expense ratio (“MER”) is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
