Annual Management Report of Fund Performance

For the period ended December 31, 2017

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Annual Management Report of Fund Performance (“MRFP”) for the WisdomTree Canada Quality Dividend Growth Index ETF (the “ETF”) for the period ended December 31, 2017. The ETF trades on the Toronto Stock exchange (the “TSX”) under the ticker symbol DGRC.

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Capital Management Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree Canada Quality Dividend Growth Index (the “Index”), before fees and expenses. The Index is a fundamentally weighted index designed to provide exposure to dividend-paying Canadian companies with growth characteristics.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended December 31, 2017. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

From the ETF’s inception of September 19, 2017 to December 31, 2017, the ETF operated in accordance with its investment objective of tracking the Index and returned 7.06% versus the index return of 7.17%. The difference in performance of the ETF relative to its benchmark index is related to management fees and other miscellaneous factors.

The Canadian equity market, as measured by the MSCI Canada Index, returned 9.22% in Canadian dollar terms for the 12-month period ended December 31, 2017 and 8.46% for the period the ETF was operating. The period was characterized by its relatively indecisive price action through the later part of the year in lieu of little market moving news. This is likely due to the volatility around crude oil through August of 2017 and its importance to Canada’s commodity centric economy. The later part of the year was characterized by a strong rally in equity markets driven by two predominant forces. The first of these was a rally in crude prices. The second main driver was the reflationary forces that drove up commodities and interest rates. Much of this reflationary theme came on the back of very strong economic data, particularly in Canada. This data was absorbed in the Canada short rates, particularly the 2-year Canadian government bond yields acting as a tailwind on Canadian financials. These forces drove financials and materials to lead the equity rally returning 7.6% and 7.2% in local currency returns respectively. Conversely, one of the worst performing sectors was telecommunication services returning 3.4%. The ETF faced headwinds as it was significantly underweight financials by 26% as well as overweight telecommunication services by 11% versus the MSCI Canada Index.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. The ETF did not meet the requirements of a mutual fund trust as of December 31, 2017. The ETF is deemed a financial institution (“FI”) for tax purposes since significant units are held by FI’s and therefore has made the required distributions to meet the requirements of an FI.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Karen Fisher ¹	Newcastle, Ontario
Gerry O’ Connor	Woodbridge, Ontario
Anthony Cox	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see “Management Fees” below).

* Commencement of operations.

¹ This information is derived from the ETF's audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at December 31 of the year shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
