Annual Management Report of Fund Performance

For the year ended December 31, 2017

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Annual Management Report of Fund Performance (“MRFP”) for the WisdomTree U.S. High Dividend Index ETF (the “ETF”) for the year ended December 31, 2017. The ETF trades on the Toronto Stock exchange (the “TSX”) under the ticker symbols HID (Hedged Units) and HID.B (Non-Hedged Units).

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Capital Management Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree U.S. High Dividend Index CAD (the “Index”), before fees and expenses. The Index is a fundamentally weighted index designed to provide exposure to companies with high dividend yields selected from the WisdomTree Dividend Index.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to track the price and yield performance of the Index. The ETF uses derivative instruments to hedge the U.S. dollar exposure of the securities attributable to the Hedged Units to the Canadian dollar. Any U.S. dollar exposure of the securities attributable to the Non-Hedged Units will not be hedged to the Canadian dollar.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the year ended December 31, 2017. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the 12 months ended December 31, 2017, the Non-Hedged Units returned 3.98% versus the index return of 4.38%. The Hedged Units returned 10.47% versus the 10.96% return of their benchmark index, WisdomTree U.S. High Dividend Index CAD-Hedged. The difference in performance of the ETF from the index is related to management fees and other miscellaneous factors.

The U.S. equity market, as measured by the S&P 500 Index, returned 21.83% in U.S. dollar terms and 13.83% in Canadian dollar terms for the 12-month period ended December 31, 2017. The period was characterized by its absence of significant market volatility in favor of generally steady gains, powered primarily by positive consumer and business survey data and corporate profit growth. At the end of the period, in the build up to reforms to the U.S. tax code equity markets rallied on a significant lowering of the corporate tax rate. These pro-growth policies favored growth stocks and small cap stocks with their local focus leading into the end of the period. Additionally, real 5-year U.S. rates began diverging with nominal 5-year U.S. rates which is important to note as the U.S. dollar declined along with the real rates towards the end of the period. With the Federal Reserve signaling more interest rate hikes in 2018, interest rate sensitive sectors such as Telecommunication services, energy, and real estate underperformed returning -1.22%, -1.08%, and 10.72% respectively. Their growth counterparts such as consumer discretionary and information technology returned 23.38% and 39.39%, respectively. The ETF faced headwinds as the portfolio was significantly underweight technology by about 14%, and overweight telecoms by about 6% relative to the S&P 500 Index.

The U.S. dollar strengthened following the election driven by higher U.S. sovereign debt yields, but that strengthening was reversed as inflationary price action occurred across asset classes, and the U.S. dollar lost approximately 6.47% to the Canadian dollar over the period. The performance of the Hedged Units and Non-Hedged Units diverged as the weakening U.S. dollar acted as a headwind to the returns of the Non-Hedged Units.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. The ETF did not meet the requirements of a mutual fund trust as of December 31, 2017. The ETF is deemed a financial institution (“FI”) for tax purposes since significant units are held by FIs and therefore has made the required distributions to meet the requirements of an FI.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. Anthony Cox was appointed to the IRC to replace Steven Rostowsky whose term ended on July 12, 2017. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Karen Fisher ¹	Newcastle, Ontario
Gerry O’ Connor	Woodbridge, Ontario
Anthony Cox	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see “Management Fees” below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net assets value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at December 31 of the year shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ Amount represents less than 0.005%.

⁸ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
