Interim Management Report of Fund Performance

For the six-month period ended June 30, 2019

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Interim Management Report of Fund Performance (“MRFP”) for the WisdomTree Yield Enhanced Canada Short-Term Aggregate Bond Index ETF (the “ETF”) for the period ended June 30, 2019. The ETF trades on the Toronto Stock Exchange (the “TSX”) under the ticker symbol CAGS.

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Investments Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the Bloomberg Barclays Canadian Short Aggregate Enhanced Yield Index (the “Index”), before fees and expenses. The Index is designed to broadly capture the short-term Canadian investment grade fixed income securities market while seeking to enhance yield within desired risk parameters and constraints.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index. The ETF may also invest in or use certain other securities to obtain exposure to the price and yield performance of the Index.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended June 30, 2019. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the six months ended June 30, 2019, the ETF returned 3.69% versus the Index return of 2.68%. The difference in performance of the ETF relative to its benchmark index is related to management fees and other miscellaneous factors.

The broad Canadian bond market, as measured by the Bloomberg Barclays Canadian Aggregate Index, returned 6.61% in CAD terms over the same period. The broad short-term Canadian bond market, as measured by the Bloomberg Barclays Canadian Agg 1-5 Year Composite Index, returned 2.68% in CAD during the same period.

The period was characterized by higher-than-normal volatility for equities, particularly in the fourth quarter of 2018, as a result of trade tensions and a partial global slowdown. The volatility in the global markets carried over into the bond markets as well. Particularly, these volatile equity market bouts caused “risk-off” buying into safer bond asset classes. The strategy’s credit overweight served as a headwind towards the end of 2018, as the Canadian credit underperformed the Canadian treasury market within the broad short aggregate benchmark.

However, 2019 saw a rebound in credit and the overall market as global trade concerns eased and dovish monetary policy caused global equities to rebound. The Bank of Canada (BOC) raised rates 3 times in 2018 to 1.75%, driving shorter nominal yields higher. Strategies that were short duration risk would have benefited versus those that were longer duration risk. Like the U.S. yield curve, the Canadian yield curve has flattened significantly. The very short end of the yield curve, represented by the 3-month tenured bonds, rose in yield by 44 basis points over 2018. Through the first half of 2019, rates have declined, which has benefited longer maturity securities.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. In 2019, WisdomTree published the investment risk level for each WisdomTree ETF, in accordance with the investment risk classification methodology prescribed by National Instrument 81-102 — *Investment Funds*. The ETF’s investment risk level may be found in the prospectus and ETF Facts.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Leslie Wood	Pickering, Ontario
W. William Woods	Toronto, Ontario
Anthony Cox ¹	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see “Management Fees” below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net asset value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's unaudited and audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at June 30 and December 31 of the years shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.

PAST PERFORMANCE

The ETF's performance information shown assumes that all distributions made by the ETF in the periods shown were reinvested in additional units of the ETF. These returns do not take into account sales, redemption, distribution or optional charges or income taxes payable by any unitholder that would have reduced returns. These returns do not indicate how each class of the ETF will perform in the future.

Year-by-Year Returns

The following bar chart shows the performance of the ETF for each of the financial years shown and for the six month period ended June 30, 2019. The chart shows in percentage terms how much an investment made on the first day of the period would have increased or decreased by the last day of the period.
