Interim Management Report of Fund Performance

For the six-month period ended June 30, 2019

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Interim Management Report of Fund Performance (“MRFP”) for the WisdomTree Europe Hedged Equity Index ETF (the “ETF”) for the period ended June 30, 2019. The ETF trades on the Toronto Stock Exchange (the “TSX”) under the ticker symbols EHE (Hedged Units) and EHE.B (Non-Hedged Units).

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Investments Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree Europe CAD-Hedged Equity Index (the “Index”), before fees and expenses. The Index is a fundamentally weighted index designed to provide exposure to dividend paying European equities while at the same time neutralizing exposure to fluctuations between the Euro and the Canadian dollar. The exposure that the portion of the ETF’s portfolio attributable to the Non-Hedged Units has to foreign currencies will not be hedged back to the Canadian dollar.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index, or other securities, to track the price and yield performance of the Index. The ETF uses derivative instruments to hedge the foreign currency exposure of the securities attributable to the Hedged Units to the Canadian dollar.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended June 30, 2019. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the six months ended June 30, 2019, the Hedged Units returned 17.89% versus the Index return of 18.37%. The Non-Hedged Units returned 11.64% versus a return of 11.91% for their benchmark Index, WisdomTree Europe Equity Index CAD. The difference in performance of the Hedged Units and Non-Hedged Units relative to their respective benchmark indexes is related to management fees and other miscellaneous factors.

The Eurozone equity market, as measured by the MSCI EMU Index, returned 16.41% in local currency terms and approximately 11.81% in Canadian dollar terms for the 6-month period ended June 30, 2019. The time period was characterized by concerns about slowing global economic growth, uncertainty in the outcome of U.S.-China trade negotiations, slowing Eurozone economic growth, and growing expectations for easing monetary policy. During this time period the European Central Bank took measures to stimulate private sector bank lending while keeping monetary policy unchanged and signaling the potential for future easing. In Germany, manufacturing survey data contracted, and 10-year German government bond yields entered negative territory for the first time since 2016. Meanwhile, Italy exited a recession in the first quarter of 2019, although concerns about the country’s growing budget deficit remained an overhang. Within the UK, multiple variations of a BREXIT resolution were rejected, including an election to break away from the European Union without a deal altogether. Ultimately, Theresa May stepped down as Prime Minister and the resolution of BREXIT was again delayed. Notably, this time period was characterized by substantial political fragmentation and uncertainty in the Eurozone – the number of seats held by populist parties hit an all-time high in the European Parliament elections. Despite cuts to expectations for Eurozone economic growth, driven in part by contraction in manufacturing survey data and falling inflation levels, European equities rallied in the six-months ended June 30, 2019 on expectations for easing monetary policy conditions and improved global trade relations.

The top performing sectors in local currencies were Information Technology (24.8%), Industrials (19.4%), and Consumer Discretionary (18.9%). The worst performing sectors in local currencies included Communication Services (-0.87%), Real Estate, (1.86%), and Financials (7.9%). This proved to be a modest tailwind for the ETF as the portfolio was overweight Consumer Discretionary by about 8%, and underweight both Energy and Financials by about 7% relative to the MSCI MEU Index.

The Canadian dollar strengthened by 4.76% relative to the euro during the six months ended June 30, 2019. The performance of the Hedged Units and Non-Hedged Units diverged as the strengthening of the Canadian dollar acted as a headwind to the returns of the Non-Hedged Units.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. In 2019, WisdomTree published the investment risk level for each WisdomTree ETF, in accordance with the investment risk classification methodology prescribed by National Instrument 81-102 — *Investment Funds*. The ETF's investment risk level may be found in the prospectus and ETF Facts.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* ("NI 81-107"), WisdomTree has established an independent review committee (the "IRC") to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Leslie Wood	Pickering, Ontario
W. William Woods	Toronto, Ontario
Anthony Cox ¹	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see "Management Fees" below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net asset value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's unaudited and audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at June 30 and December 31 of the years shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
