Interim Management Report of Fund Performance

For the six-month period ended June 30, 2019

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Interim Management Report of Fund Performance (“MRFP”) for the WisdomTree Emerging Markets Dividend Index ETF (the “ETF”) for the period ended June 30, 2019. The ETF trades on the Toronto Stock Exchange (the “TSX”) under the ticker symbol EMV.B.

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Investments Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree Emerging Markets Dividend Index CAD (the “Index”), before fees and expenses. The Index is a fundamentally weighted index that measures the performance of dividend-paying stocks within emerging markets.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended June 30, 2019. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the six months ended June 30, 2019 the ETF returned 5.82% versus the Index return of 6.33%. The difference in performance of the ETF relative to its benchmark index is related to management fees and other miscellaneous factors.

The emerging market equities, as measured by the MSCI Emerging Markets Index, returned 10.05% in local currency terms and 5.81% in Canadian dollar terms for the period. Economic stimulus implemented by the Chinese government and easing trade tensions with the U.S. were substantial drivers of positive equity market performance in China as well as in export-oriented countries in the first quarter of 2019. Expectations for flat-to-lower U.S. interest rates also bolstered emerging market returns in the first quarter. Many emerging market countries with economies that are heavily reliant on the performance of the energy market benefited from a recovery in oil prices following a cut in global production in early 2019. Positive sentiment around global trade was somewhat offset by troubled emerging market economies in the first quarter of 2019, including Argentina’s persistently high inflation and a contracting GDP as well as South Africa’s shrinking economy.

Emerging market equities sold-off in May 2019, driven by the breakdown in U.S.-China trade negotiations. A less constructive outlook for global trade negatively impacted oil prices amid mounting concerns about oversupply and low demand. Meanwhile, Indian Prime Minister Modi was reelected for a second five-year term, which was a positive catalyst for Indian equities during this time period. The resumption of U.S.-China trade negotiations in June 2019 alongside falling oil inventories and increased expectations for easing monetary policy in the developed world, especially in the U.S., led emerging market equities to recover through June 2019.

Emerging market currencies broadly weakened versus the Canadian dollar for the six months ended June 30, 2019. It is important to note that depreciation of the Argentine peso and Turkish lira contributed to local currency outperformance.

The strongest performing sectors in local currencies during the six-month period ending June 30, 2019 were Consumer Discretionary (18.9%), Real Estate, (12.5%), and Energy (12.0%). The worst performing sectors in local currencies included Health Care (-3.6%), Industrials (3.7%), and Materials (4.1%). This proved to be a modest headwind for the ETF as the portfolio was underweight Consumer Discretionary by about 7% and overweight Materials by about 3% relative to the MSCI Emerging Markets Index.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. In 2019, WisdomTree published the investment risk level for each WisdomTree ETF, in accordance with the investment risk classification methodology prescribed by National Instrument 81-102 — *Investment Funds*. The ETF’s investment risk level may be found in the prospectus and ETF Facts.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC

by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Leslie Wood	Pickering, Ontario
W. William Woods	Toronto, Ontario
Anthony Cox ¹	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see “Management Fees” below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net asset value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's unaudited and audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at June 30 and December 31 of the years shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
