Interim Management Report of Fund Performance

For the six-month period ended June 30, 2019

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Interim Management Report of Fund Performance (“MRFP”) for the WisdomTree Japan Equity Index ETF (the “ETF”) for the period ended June 30, 2019. The ETF trades on the Toronto Stock Exchange (the “TSX”) under the ticker symbols JAPN (Hedged Units) and JAPN.B (Non-Hedged Units).

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Investments Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree Japan Equity Index CAD (the “Index”), before fees and expenses.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended June 30, 2019. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the six months ended June 30, 2019, the Hedged Units returned 4.64% versus the Index return of 4.92%. The Non-Hedged Units returned 1.35% versus a return of 1.74% for their benchmark index, WisdomTree Japan Equity Index CAD. The difference in performance of the Hedged Units and Non-Hedged Units relative to their respective benchmark indexes is related to management fees and other miscellaneous factors.

The Japanese equity market, as measured by the MSCI Japan Index, returned around 5.81% in local currency terms and approximately 3.09% in Canadian dollar terms for the six-month period ended June 30, 2019. The weak performance of the Japanese equity market was driven by worse than initially reported economic data in the third quarter, as strong typhoons and a powerful earthquake severely disrupted economic activity. Additionally, a large market bout of volatility occurred in the fourth quarter of 2018 as a result of global trade tensions.

In December, the Japanese government unveiled a tax reform package for fiscal year 2019 to serve as a counter to the negative effects of a consumption tax hike that will commence later in 2019. Shortly after this announcement, the 2019 budget was announced revealing this will be the first-time total spending will rise above JPY 100 trillion, showcasing their difficulties curtailing expenditures. For the first half of 2019, Japanese equities have seen a rebound from fourth quarter lows in 2018, sparked by easing global trade tensions. However, weaker local currency moves continue to suppress larger local growth.

The Canadian dollar appreciated by 2.34% relative to the yen during the first half of 2019. The performance of the Hedged Units and Non-Hedged Units diverged as the strengthening of the Canadian dollar acted as a headwind to the returns of the Non-Hedged Units.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. In 2019, WisdomTree published the investment risk level for each WisdomTree ETF, in accordance with the investment risk classification methodology prescribed by National Instrument 81-102 — *Investment Funds*. The ETF’s investment risk level may be found in the prospectus and ETF Facts.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* (“NI 81-107”), WisdomTree has established an independent review committee (the “IRC”) to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Leslie Wood	Pickering, Ontario
W. William Woods	Toronto, Ontario
Anthony Cox ¹	Toronto, Ontario

¹ Chair of the IRC

Closing market price	\$21.79	\$20.93

* Commencement of operations.

¹ This information is derived from the ETF's unaudited and audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at June 30 and December 31 of the years shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
