Interim Management Report of Fund Performance

For the six-month period ended June 30, 2019

MANAGEMENT REPORT OF FUND PERFORMANCE

WisdomTree Asset Management Canada, Inc. (“WisdomTree”) is pleased to provide you with the Interim Management Report of Fund Performance (“MRFP”) for the WisdomTree U.S. MidCap Dividend Index ETF (the “ETF”) for the period ended June 30, 2019. The ETF trades on the Toronto Stock Exchange (the “TSX”) under the ticker symbols UMI (Hedged Units) and UMLB (Non-Hedged Units).

WisdomTree is the trustee, manager and promoter of the ETF. Mellon Investments Corporation (the “Investment Advisor”) is the investment advisor to the ETF.

Investment Objectives and Strategies

The investment objective of the ETF is to track, to the extent possible, the price and yield performance of the WisdomTree U.S. MidCap Dividend Index CAD (the “Index”), before fees and expenses. The Index is a fundamentally weighted index designed to provide exposure to the mid-capitalization segment of the U.S. dividend-paying market.

The investment strategy of the ETF is to invest in and hold a proportionate share of the constituent securities of the Index or otherwise invest in a manner intended to track the price and yield performance of the Index. The ETF uses derivative instruments to hedge the U.S. dollar exposure of the securities attributable to the Hedged Units to the Canadian dollar. Any U.S. dollar exposure of the securities attributable to the Non-Hedged Units will not be hedged to the Canadian dollar.

Risk

No material changes were made which affected the overall level of risk associated with an investment in the ETF for the period ended June 30, 2019. The overall level of risk associated with an investment in the ETF remains as disclosed in the most recent prospectus.

Results of Operations

For the six months ended June 30, 2019, the Non-Hedged Units returned 10.83% versus the Index return of 11.04%. The Hedged Units returned 14.31% versus the 14.50% return of their benchmark index, WisdomTree U.S. MidCap Dividend Index CAD-Hedged. The difference in performance of the Non-Hedged Units and Hedged Units relative to their respective benchmark indexes is related to management fees and other miscellaneous factors.

The U.S. equity market, as measured by the S&P 500 Index, returned 18.18% in U.S. dollar terms and 13.57% in Canadian dollar terms for the 6-month period ended June 30, 2019.

In the first quarter of 2019 the U.S. equity market, as measured by the S&P 500 Index, rebounded sharply to return 13.47% in U.S. dollar terms. Indicators of economic growth signaled a mix of moderating growth and continued strength. Purchasing Managers’ Index survey data decreased, although the level remained consistent with the average it had been across periods of economic expansion. Meanwhile, payroll wage, and unemployment data exceeded expectations. The delayed release of fourth-quarter and full-year 2018 gross domestic product (“GDP”) fueled positive equity market returns. 2018 real GDP growth of 2.9% was stronger than anticipated and marked a rate of expansion that had only been reached two other times since 2005. The Federal Reserve (“the Fed”) also paused its multi-year rate hike program for the time being and stressed that further rate actions would be data dependent. Easing monetary policy and more constructive U.S.-China trade negotiations drove positive sentiment in U.S. equity markets.

The second quarter of 2019 was characterized by a continued relief rally in U.S. stocks through April 2019, followed by a sell-off in May 2019, and a subsequent recovery in June 2019. The release of stronger than anticipated first quarter GDP growth as well the continuation of solid jobs and wages gains alongside record low unemployment levels helped drive positive equity market returns in April 2019. In early May 2019, U.S.-China trade negotiations broke down – the U.S. increased tariffs to 25% from 10% on \$200 billion in Chinese goods, and China responded in-kind by raising tariffs on U.S. imports. Leading up to the Fed June 2019 meeting, core inflation remained below the Fed’s 2% target, manufacturing survey data slightly deteriorated, and the May jobs report came in meaningfully below expectations. In June 2019, the Fed’s outlook for the U.S. economy was markedly uncertain. The Fed left its target monetary policy rate unchanged and indicated that future rate action would be taken if needed to sustain the U.S. economic expansion. Expectations for future Fed rate cuts along with resumption of U.S.-China trade negotiations at the upcoming G-20 forum led U.S. equities higher through the end of June to return 4.15% in U.S. dollar terms in the second quarter of 2019.

Information Technology, Consumer Discretionary, and Industrials were the best performing sectors, returning 27.1%, 21.8%, and 21.4%, respectively in U.S. dollars. Health Care, Energy, and Utilities were the weakest sectors, although they still generated positive returns of 8.1%, 13.1%, and 14.7%, respectively in U.S. dollars, over the six-month period ended June 30, 2019. The ETF faced headwinds as the portfolio was underweight Informational Technology by about 13% and overweight Utilities by about 5% relative to the S&P 500 Index.

WisdomTree U.S. MidCap Dividend Index ETF

(continued)

The U.S. dollar weakened in first six months of 2019 driven by falling U.S. interest rates; the U.S. dollar weakened approximately 3.97% to the Canadian dollar over the period. The performance of the Hedged Units and Non-Hedged Units diverged as the depreciation of U.S. dollar acted as a headwind to the returns of the Non-Hedged Units.

RECENT DEVELOPMENTS

There have not been any material changes to the management of the ETF. In 2019, WisdomTree published the investment risk level for each WisdomTree ETF, in accordance with the investment risk classification methodology prescribed by National Instrument 81-102 — *Investment Funds*. The ETF's investment risk level may be found in the prospectus and ETF Facts.

As required by National Instrument 81-107 — *Independent Review Committee for Investment Funds* ("NI 81-107"), WisdomTree has established an independent review committee (the "IRC") to review all conflict of interest matters identified and referred to the IRC by WisdomTree and to give its approval or recommendation, depending on the nature of the conflict of interest matters. The current members of the IRC for the WisdomTree ETFs are as follows:

Name	Municipality of Residence
Leslie Wood	Pickering, Ontario
W. William Woods	Toronto, Ontario
Anthony Cox ¹	Toronto, Ontario

¹ Chair of the IRC

RELATED PARTY TRANSACTIONS

WisdomTree is the trustee, manager and promoter of the ETF and is responsible for the administration of the WisdomTree ETFs. Each WisdomTree ETF pays the manager a management fee (see "Management Fees" below).

Management Fees

The ETF pays WisdomTree a management fee as set forth in the table below based on the average daily net asset value of the ETF. The management fee, plus applicable taxes, is accrued daily and paid monthly in arrears. WisdomTree may, from time to time in its discretion, waive all or a portion of the management fee charged at any given time.

* Commencement of operations.

¹ This information is derived from the ETF's unaudited and audited financial statements.

² Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of units outstanding over the period.

³ Distributions were either paid in cash or reinvested in additional units of the ETF, or both. Reinvested units were consolidated.

⁴ This information is provided as at June 30 and December 31 of the years shown.

⁵ The management expense ratio ("MER") is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of average daily net asset value during the period. MER includes the waiver or absorption of certain operating expenses by WisdomTree, while the MER before waivers or absorptions shows the MER prior to operating expenses being waived or absorbed by WisdomTree.

⁶ The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of average daily net assets during the period.

⁷ Amount represents less than 0.005%.

⁸ The ETF's portfolio turnover rate indicates how actively the ETF's portfolio manager trades its portfolio investments. A portfolio turnover rate of 100% is equivalent to the ETF buying and selling all of the securities in its portfolio once in the course of the period. The higher a portfolio's turnover rate in a period, the greater the trading costs payable by the ETF in the period, and the greater the chance of an investor receiving taxable capital gains in the period. There is not necessarily a relationship between a high turnover rate and the performance of the ETF.
