Number of days traded*: n/a

Pricing Information (12 months ending April 30, 2018)
Market Price*: n/a
Net Asset Value (NAV)*: n/a
Average Bid-Ask Spread*: n/a

How risky is it?
The value of the ETF can go down as well as up. You could lose money.

One way to gauge risk is to look at how much an ETF’s returns change over time. This is called “volatility.” In general, ETFs with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. ETFs with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

Risk rating
WisdomTree Asset Management Canada, Inc. has rated the volatility of this ETF as high.

Because this is a new ETF, the risk rating is only an estimate by WisdomTree Asset Management Canada, Inc. Generally, the risk rating is based on how much the ETF’s returns have changed from year to year. It doesn’t tell you how volatile the ETF will be in the future. The rating can change over time. An ETF with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the ETF’s returns, see the Risk Factors section of the ETF’s prospectus.

No Guarantees
ETFs do not have any guarantees. You may not get back the amount of money you invest.

Non-Hedged Units
WisdomTree Asset Management Canada, Inc.
CHNA.B

How has the ETF performed?
This section tells you how non-hedged units of the ETF have performed, with returns calculated using the ETF’s net asset value (NAV). However, this information is not available because the ETF is new.

Year-by-year Returns
This section tells you how non-hedged units of the ETF performed in past calendar years. However, this information is not available because the ETF is new.

Best and Worst 3-month returns
This section shows the best and worst returns for non-hedged units of the ETF in a 3-month period. However, this information is not available because the ETF is new.

Average return
This section shows the value and annual compounded rate of return of a hypothetical $1,000 investment in non-hedged units of the ETF. However, this information is not available because the ETF is new.

Trading ETFs
ETFs hold a basket of investments, like mutual funds, but trade on exchanges like stocks. Here are a few things to keep in mind when trading ETFs:

Pricing
ETFs have two sets of prices: market price and net asset value (NAV).

Market price
- ETFs are bought and sold on exchanges at the market price. The market price can change throughout the trading day. Factors like supply, demand, and changes in the value of an ETF’s investment can affect the market price.
- You can get price quotes any time during the trading day. Quotes have two parts: bid and ask.
- The bid is the highest price a buyer is willing to pay if you want to sell your ETF units. The ask is the lowest price a seller is willing to accept if you want to buy ETF units. The difference between the two is called the “bid-ask spread”.
- In general, a smaller bid-ask spread means the ETF is more liquid. That means you are more likely to get the price you expect.

Net asset value (NAV)
Like mutual funds, ETFs have a NAV. It is calculated after the close of each trading day and reflects the value of the ETF’s investments at that point in time.

Orders
There are two main options for placing trades: market orders and limit orders. A market order lets you buy or sell units at the current market price. A limit order lets you set the price at which you are willing to buy or sell units.

Timing
In general, market prices of ETFs can be more volatile around the start and end of the trading day. Consider using a limit order or placing a trade at another time during the trading day.

Who is this ETF for?
Investors who:
- want to invest in a broad range of equity securities of Chinese companies
- can handle the ups and downs of the stock market

A word about tax
In general, you’ll have to pay income tax on any money you make on an ETF. How much you pay depends on the tax laws where you live and whether or not you hold the ETF in a registered plan, such as a Registered Retirement Savings Plan or a Tax-Free Savings Account.

Keep in mind that if you hold your ETF in a non-registered account, distributions from the ETF are included in your taxable income, whether you get them in cash or have them reinvested.
How much does it cost?
This section shows the fees and expenses you could pay to buy, own and sell non-hedged units of the ETF. Fees and expenses - including any trailing commissions - can vary among ETFs.

Higher commissions can influence representatives to recommend one investment over another. Ask about other ETFs and investments that may be suitable for you at a lower cost.

Brokerage commissions
You may have to pay a commission when you buy and sell non-hedged units of the ETF. Commissions may vary by brokerage firm. Some brokerage firms may offer commission-free ETFs or require a minimum purchase amount.

ETF expenses
You don’t pay these expenses directly. They affect you because they reduce the ETFs returns.

The ETF’s annual management fee is 0.55% of the ETF’s value. The fund’s operating expenses and trading costs are not yet available because no non-hedged units of the fund have been issued to the public to date.
